Arquitex always strives to breathe life into architecture. With ASCALE - a new multi-purpose, lightweight, large-format tile collection, it has excelled in doing so.

Arquitex constantly updates and renews its products in order to meet the needs of today's new lifestyles. The value of a recognized brand name, effort, dedication, innovation and quality are the cornerstones of any industry.

ASCALE brings added value to top-range porcelain tiles, boosting their technical benefits by ensuring a lower weight and greater adaptability.

ASCALE is a large porcelain slab with a 126x63in (320x160cm) size, which is available in two different thicknesses, 12mm and 6mm. Both thicknesses can be combined to work together for covering any vertical or horizontal facing surfaces. The combination of these 6 and 12 mm thicknesses make ASCALE an unbeatable solution for professionals in the construction sector and the worlds of architecture and interior design. They allow for the creation of unique, elegant settings with the outstanding technical performance of Arquitex porcelain tile products.

¿Por qué utilizar ASCALE?

Porque nuestro porcelánico ofrece unas prestaciones técnicas óptimas para cualquier superficie de trabajo, igualando o incluso superando el valor estético de cualquier otro material.

Además, nuestras placas de 12 mm incorporan un refuerzo de malla de fibra de vidrio en el dorso, que hace que nuestro material alcance valores máximos de resistencia.

Why use ASCALE?

Because the superior technical characteristics of our porcelain tiles make them suitable for use as worktops of all kinds, with a visual appeal that equals and even surpasses that of any other material.

In addition, our 12mm-thick slabs are reinforced with a fibreglass mesh-backing to ensure maximum resistance.
